

Ethical Hacking Practical No. 1

AIM:) Using Google AND WHOSSE

i) Files Containing Passwords

This screenshot shows the Exploit-DB interface for entry GHDB-ID: 4899. The search query used is `intext:"login" department | admin | manager | company | host filetype:xls | xlsx -community -github`. The author is BRUNO SCHMID, published on 2018-08-03. The Google Dork Description is `intext:'login' department | admin | manager | company | host filetype:xls | xlsx -community -github`. The Google Search result is `intext:"login" department | admin | manager | company | host filetype:xls | xlsx -community -github`. The description states: "Some spreadsheet containing passwords" and provides a LinkedIn profile link: `https://ch.linkedin.com/in/schmidbruno`. The bottom navigation bar includes Databases, Links, Sites, and Solutions.

This screenshot shows the Exploit-DB interface for entry GHDB-ID: 4921. The search query used is `"whoops! there was an error." "db_password"`. The author is ROOTKIT_PENTESTER, published on 2018-08-14. The Google Dork Description is `"whoops! there was an error." "db_password"`. The Google Search result is `"whoops! there was an error." "db_password"`. The description states: "Dork with lots of passwords!" and "Dork discover by Rootkit Pentester.". The bottom navigation bar includes Databases, Links, Sites, and Solutions. The footer includes Exploits, Search Exploit-DB, OffSec, and Courses and Certifications.

Ethical Hacking Practical No. 1

The screenshot shows the Exploit-DB website interface. The search query is `inurl "/admin/index.php" username=admin&password=password`. The results card for GHDB-ID 7149 by SAHIL GUPTA is displayed. It includes a Google Dork description and a Google Search link. Below the card, a code block shows the search query and metadata. At the bottom, there are tabs for Databases, Links, Sites, and Solutions.

EXPLOIT DATABASE

`inurl "/admin/index.php" username=admin&password=password`

GHDB-ID: 7149
Author: SAHIL GUPTA
Published: 2021-09-02

Google Dork Description:
`inurl "/admin/index.php" username=admin&password=password`
Google Search: `inurl "/admin/index.php" username=admin&password=password`

Google Dork: `inurl "/admin/index.php" username=admin&password=password`

The screenshot shows the Exploit-DB website interface. The search query is `intitle:"index of" intext:login.csv`. The results card for GHDB-ID 4954 by GIONATHAN REALE is displayed. It includes a Google Dork description and a Google Search link. Below the card, a code block shows the search query and a description of the Google Dork's purpose. At the bottom, there is a citation for Gionathan "John" Reale.

EXPLOIT DATABASE

`intitle:"index of" intext:login.csv`

GHDB-ID: 4954
Author: GIONATHAN REALE
Published: 2018-09-14

Google Dork Description:
`intitle:"index of" intext:login.csv`
Google Search: `intitle:"index of" intext:login.csv`

`intitle:"index of" intext:login.csv`

This Google Dork discovers servers with open directories exposing login information files.

- Gionathan "John" Reale (<https://www.exploit-db.com/author/?a=9689>)

ii) Pages Containing Login Portals

Ethical Hacking Practical No. 1

The image is a screenshot of a Windows desktop with two browser windows open. The top window displays the Exploit Database website, showing a search result for the query `inurl "/admin/index.php" username=admin&password=password`. The result includes a GHDB-ID of 7149, an author named SAHIL GUPTA, and a publication date of 2021-09-02. The Google Dork description is also visible. The bottom window shows a V8 Viewer application displaying a live video feed from a camera. The video feed shows an indoor office or laboratory setting with desks, chairs, and equipment. The V8 Viewer interface includes a toolbar with various controls like zoom, pan, and a status bar at the bottom.

Exploit Database Search Result:

inurl "/admin/index.php" username=admin&password=password

GHDB-ID: 7149
Author: SAHIL GUPTA
Published: 2021-09-02

Google Dork Description:
inurl "/admin/index.php" username=admin&password=password
Google Search: inurl "/admin/index.php" username=admin&password=password

Google Dork: inurl "/admin/index.php" username=admin&password=password
Pages Containing Login Portals
Date: 31/08/2021

The screenshot shows the Exploit Database website interface. The search bar at the top contains the query: `ext:env intext:APP_ENV= | intext:APP_DEBUG= | intext:APP_KEY=`. The search results display a single entry with the following details:

- GHDB-ID:** 4997
- Author:** NIRMAL DAHAL
- Published:** 2018-10-24
- Google Dork Description:** `ext:env intext:APP_ENV= | intext:APP_DEBUG= | intext:APP_KEY=`
- Google Search:** `ext:env intext:APP_ENV= | intext:APP_DEBUG= | intext:APP_KEY=`

The description of the exploit states: "You can find 'Environment Configuration' file (*.env) Of 'laravel' by searching '*ext:env intext:APP_ENV= | intext:APP_DEBUG= | intext:APP_KEY=' Where you can get 'Credentials of database and SMTP servers'". The author is identified as Nirmal Dahal (@Nittam).

The bottom navigation bar includes links for Databases, Links, Sites, and Solutions. The Windows taskbar at the bottom shows the date as 20-07-2026 and the time as 11:23.

B) Using Whois

The screenshot shows the ICANN Registration data lookup tool interface. The title is "Registration data lookup tool". Below the title, there is a text input field for entering a domain name or an Internet number resource (IP Network or ASN). The input field contains the text "www.instagram.com". To the right of the input field is a blue button labeled "Lookup".

Below the input field, there is a disclaimer: "By submitting any personal data, I acknowledge and agree that the personal data submitted by me will be processed in accordance with the ICANN Privacy Policy, and agree to abide by the website Terms of Service and the registration data lookup tool Terms of Use." Below the disclaimer, there is a link to "https://www.icann.org/en/accredited-registrars".

Below the link, there is a message: "If the registration data you are seeking is not provided in the lookup results, please use the Registration Data Request Service (RDRS) to submit a request for nonpublic registration data. RDRS is intended for use by requestors with a legitimate interest in accessing nonpublic registration data." Below the message, there is a box containing the text: "The client was unable to process information from the Registrar RDAP server. The information below is shown as provided by the TLD Registry RDAP service. This may be due to technical issues by the RDAP server operator. If you believe this to be the issue, please send email to globalsupport@icann.org."

Below the box, there is a section titled "Domain Information" with a dark blue background. Below the section title, there is a light blue box containing the text: "Name: INSTAGRAM.COM".
